

## Links Added

Sunday, April 25th 2004

I have just added a [links section](#) to the site. I will link to your site if you wish, but you must link to my site as well. I will review every request for a link to ensure spam free and valid links. I will put your logo there to if you want as long as its not a huge graphic. So lets make both our site show better on google, [submit your link now](#).
