

Free SuSE Linux 9.1 Professional

Thursday, June 24th 2004

I was just at KentVille, and found this post with a link to Novell to get a bunch of Linux software for free. Here's the list from Novell:

With over 10GB of fully-functional software, this tool will help you test and evaluate Linux products from Novell in your home test lab.

Â» SUSE LINUX Standard Server 8.0

Â» SUSE LINUX 9.1 Professional

Â» Ximian Desktop 2.0

Â» Ximian Red Carpet

Â» Novell Linux Services 1.0

Â» Novell GroupWise for Linux 1.0

Â» and more
(source: [Novell](#))

I have just ordered mine and will let you know when or if it comes in. Now, quick, what are waiting for, go get it.

[Freebies from KentVille](#)

UPDATE:

I have just received the following email from Novell, letting me know that my free software is on the way. So it really is true, now go get yours.

I just wanted to let you know that the free Tech resource kit you have ordered has been shipped and you should be receiving it soon.
