

## Custom Query String Plugin 2.2

Sunday, March 13th 2005

This plugin, only for WP 1.5, will allow you to set the number posts to show for all the different "query views" and each your categories in WordPress. You can choose how many posts or days, and what to order them by, for any of the queries and/or categories. All this easily set from an options page within the admin area.

Find out more at the [project page](#).
