

The Canadian Flag, In CSS

Tuesday, March 1st 2005

I was over at Stu Nicholls today and saw this really cool [British flag](#) completely done up in CSS. So I investigated a little futher, figured out how to do "diagonals" in CSS, and started work on my own.

After wasting about an hour and a half, I came up with [my version of the Canadian Flag](#). Yes that's right *all* done in CSS, including the maple leaf. The maple leaf is a little ... off, but still, it was fun trying to figure out what triangles go where. And if you have IE, well it probably won't work, sorry. But let me know what you think. ...
