

More Smilies Plugin 1.2

Monday, April 18th 2005

I wrote this plug-in because I didn't like the default WordPress smilies , and thought it would be great if we could have "packages" of smilies that you could choose from. So here it is, a plug-in that allows you to choose between different sets of smilies. Hopefully there will be many people that do up some great smilies packages.
