

WP Mailing Lists RSS Feeds

Monday, January 30th 2006

I subscribe to the WP Hackers mailing list, but found my email client wasn't the greatest for reading the list. And I didn't feel like subscribing to all the other lists just to keep up with things. So I hacked together a nice script to create RSS feeds out of the WordPress mailing lists. It updates every hour, so there's no need to grab it every 5 minutes .

It works for all the lists by simply pointing your RSS reader to [http://mattread.com/wp-lists/feed/\[list-name\]/](http://mattread.com/wp-lists/feed/[list-name]/). Here is a list of the lists:

[Â» wp-hackers](#)

[Â» wp-docs](#)

[Â» wp-forums](#)

[Â» wp-testers](#)

[Â» wp-svn](#)

[Â» wp-polygots](#)

[Â» wp-pro](#)
